The Quality Policy of Kidstuff Playsystems

- * We will produce safe, durable and attractive products that children will find fun and challenging.
- * We will meet or exceed all customer and regulatory requirements and ship equipment on time, complete, and packaged with care and intelligence.
- * We will provide service and support which exemplify our deep commitment to partnership with customers for the well being of their children.
- * If there are problems with our equipment or installation, our commitment is to remedy the problem in a timely manner to provide the minimum possible inconvenience to our customers.
- * We see ongoing improvement to our Quality Management System as a duty to our customers and ourselves. We will review our procedures on a regular basis.
- * The quality of our equipment and our customer service will make every buying experience a positive one.

Dear Client,

Greetings from the beautiful Miller Beach in Gary, Indiana where we have been manufacturing playground equipment in the dunes near Lake Michigan since 1982.

When you are looking for playground equipment, what is important to you? That is how we approach the manufacture and sales of our playground equipment. We are not trying to put words in your mouth, but here is what playground purchasers have told us and how we address it:

- * a safe playground—IPEMA certified playground equipment to the latest ASTM standard.
- * a playground that will last a long time—21 year limited warranty.
- * a playground that will give me top value for my money—just compare us to others.
- * a playground that is age-appropriate for the playground users-- meets ASTM & CPSC standards.
- * a playground with built-in quality—our ISO 9001-2008 certification attests to our quality.
- * a company that gives top notch service when I have a need or problem—we are the best.

This catalog offers you a variety of playsystems for different age groups and different price points. We are confident there is something in here for you. Events on pages 45-54 allow you to customize your playsystem to your preferences.

Finally, we don't just offer equipment and tell you to find an installer. We provide complete installation services including a variety of safety surfaces shown on pages 63-64.

We have sales reps throughout the USA to help you choose your playground. Check our website www.kidstuffplaysystems.com and let us know when you are ready to get started. Let's do your new playground together!

Cordially yours,

Richard (Dick) Hagelberg, CPSI
CEO and Sales Manager

George R. McGuan, CPSI
President and Manager of Operations

**Playsystem # 7033-02
in red, white and blue**

**Playsystem # 5618 shown in
Green, Tan and Brown**

For steel posts and climbers, most people choose from red, royal blue, yellow, forest green, tan, brown, orange, purple, black and white—but scores of other color choices are available.

For plastics choose from red, blue, yellow, forest green, purple, tan and brown. You will see many popular color combinations throughout this catalog. Choose a playsystem you like or customize it to the colors of your choice.

Our plastic deck can handle this much block and beef and more. It is tested with over 3,000 lbs.

Choose either 3 1/2" OD or 5" OD posts. Both exceed 45,000 lbs. yield and 48,000 lbs. tensile strength.

Kidstuff clamps: the "Heart" of the playsystems. Far superior to inserts in posts. Both 3 1/2" and 5" clamps have been extensively tested to the F1487 ASTM standard and are IPEMA-certified. See www.ipema.org for a list of our IPEMA-certified products.

Stainless steel hardware and self-locking nuts are used throughout the system.

Extreme Obstacle Course # 6377

Childhood obesity is a major problem in the U.S. today. We owe it to our children to provide experiences which will encourage growth and physical development and an active lifestyle. This, in turn, will lead to healthier lives. Here are some playsystems that will help in the fight.

Extreme Obstacle Course # 6377

Challenge your kids with a variety of overhead and climbing events. Great for critical upper body development. Playsystem # 6377 includes 9 ground level events and requires a use zone of 46' x 33'. It will accommodate 15 children ages 5-12.

Quad Climber # 83904

Mini Fitness Center # 5938

For a limited space or a smaller budget, the mini fitness center might be just right for you. It features a curved overhead loop ladder, chinning bar, 2 turning bars and a vertical ladder. Required use zone is 21' x 22'.

Quad Climber # 83904

Kids will climb up and down its 2 step climbers and coil climber and slide down the ever-popular firepole. Required use zone is 33' x 18'.

Freestanding Climbing Wall # 82106

Requires 16' x 15'

Zig Zag Climbing Wall # 82203 (3 sections)

Requires 33' x 18'

Mini Fitness Center # 5938

Fun and Fitness Center # 6032

With climbers and overheads galore, your children will have hours of fun and challenge. Playsystem # 6032 includes 6 elevated play events, 5 ground level events and requires a use zone of 56' x 33'. It will accommodate 30 children ages 5-12.

Fitness Center # 7362

Fitness Center # 7362

Packed with fun and challenge, 7362 includes 3 overhead events, 5 different climbers, a fun log roll, a chin bar and a pod walk. Center accommodates 25 children ages 5-12 and requires a use zone of 44' x 32'.

Freestanding Loop Overhead Ladder # 80010

Great for developing upper body strength. Required use zone is 22' x 16'.

Wild Wall # 85503

Your children will love to climb all over this rotation-molded polyethylene, 3 section climber. It accommodates up to 9 children and requires a 20' x 40' use zone.

Combo Climber # 81411

This sturdy climber is sure to be a hit with the kids. Required use zone is 24' x 14'.

Freestanding Loop Overhead Ladder # 80010

Wild Wall # 85503

Combo Climber # 81411

Playsystem # 6960 has no platforms. It is available with 3 1/2" OD steel posts—# 6960 and 5" OD steel posts—# 6960-03.

This is a playground designed for fun and challenge for your grade schoolers. It has a variety of climbers and overhead activities without any platforms. It is an obstacle course for children to develop important muscle groups while hanging, climbing, moving from bar to bar or taking the challenge of navigating the turning wheels. The log roll develops balance and coordination. Playsystem # 6960 includes 13 ground level play events plus 11 lilypad steps.

Playsystem # 6960 accommodates about 40 children ages 5-12 and requires a use zone of 56' x 49'.

Healthtrek was developed to meet the physical development and maintenance needs of several very diverse segments of our society—youth, seniors, elite athletes, and the military as well as the general population. Everyone from elite athletes to couch potatoes, young and old, will benefit.

Healthtrek incorporates activities to develop all major muscle groups, both in terms of endurance and strength. Emphasis is placed on upper body, lower body, and abdominal muscles. The courses we have laid out provide a balanced program for the sub-group named, whether it be seniors, youth, athletes/military or the general population.

Our clients often select their own combination of activities to meet goals they have established. Our consultants have strongly recommended stretching activities at both the beginning and end of the course. There is no wrong or right way to set out the course. Some users prefer a cluster while others spread the course over a quarter of a mile or more. HealthTrek can be easily adapted to your situation. We at Kidstuff Playsystems will help you design your course. We are here to help you so you can help the people you serve.

Playsystem # 7268-02 accommodates about 75 children ages 5-12 and requires an area of 57' x 40'.

Playsystem # 7268-02

This large playsystem is perfect for the elementary school with 75 children using the playsystem at one time. Remember that many children will be playing games on the playground so you only need to accommodate roughly $\frac{1}{2}$ the children on the play equipment. With 3 slides, a double ring trek, a bridge, 8 climbers, play panels and ADA access, this playsystem has something to challenge all your children. Playsystem 7268-02 has 22 play events; 15 elevated and 7 at ground level and makes your playground ADA compliant without adding any more events.

KidsVision is a series of themed playsystems for preschool aged children. It includes 1 or 2 slides, 1 or 2 climbers, ADA compliant transfer module and several 2-color high density polyethylene (HDPE) panels depicting the theme.

KidsVision designs have been developed for a train as you see on this page, a pirate ship, the Alamo, and the nature scene shown on another page. A variation of KidsVision is themed vehicles. Elsewhere in this catalog you will find a school bus and a fire engine. Can you propose a theme for us to represent for your playground? Tell your playground consultant and we will work up your custom design.

Model # 1004 Train

Climb aboard the deluxe Kidstuff train which includes the locomotive, caboose and tank car connector. Our train with its variety of climbers and slides accommodates 30 children and requires 46' x 20'. Train # 1004 includes 6 elevated play events and an ADA compliant transfer module.

Model # 1002 Caboose

Bring back the caboose! Our caboose has 2 climbers, a slide and an ADA transfer module. It makes a perfect little playground. Caboose #1002 accommodates 14 children ages 2-5 and requires 28' x 19'.

Model # 1003 Locomotive

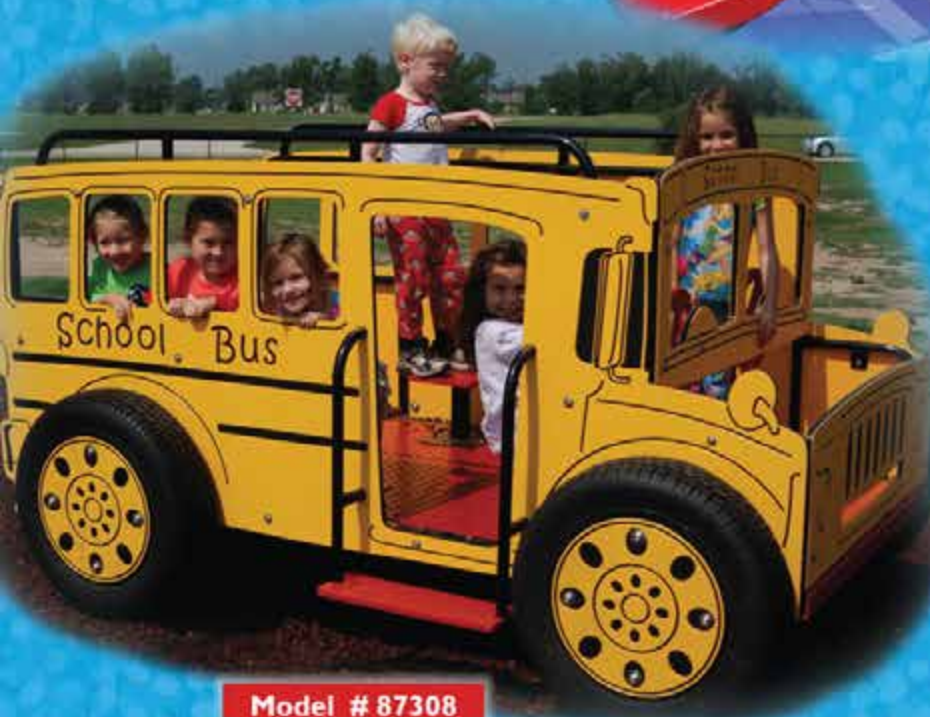

Its 2 slides, climber and ADA transfer module make the locomotive a hit with your preschoolers. Locomotive # 1003 accommodates 15 children ages 2-5 and requires a use zone of 32' x 20'.

Model # 87308

School Bus on Springs

Your children will love to play on their own school bus. We will write the name of your school on one of the panels. Also available stationary, model # 873008S. Accommodates up to 12 children ages 2-5 and requires a use zone of 20' x 18'.

Model # 87308

Model # 1005

Model # 1005

Pirate Ship

All aboard matey for a ride on the wild seas. Climb the prow, walk up the gangplank and slide into the "ocean". Our pirate ship offers many opportunities for imaginative play. Includes ADA transfer module.

Pirate Ship # 1005 accommodates about 15 children ages 2-5 and requires an area of 30' x 22'.

IPEMA Certified

To verify product certification visit www.ipema.org

Model #69608

Fire Engine on Springs

Your preschoolers will rock and roll on our unique fire engine on springs. Also available stationary (model # 69608S). Accommodates up to 12 children ages 2-5 and requires a use zone of 20' x 17'.

Model # 69608

Woodland Trees and Animals

Teachers can play many teaching games with their preschool aged children. "Which animals live around here?" "Where would you go to see a bear?" "How many trees can you count?" "How many animals do you see?" Opportunities abound for opening the door to the study of living things with which we share the world; that interdependent web of which we are a part.

Our nature theme depicts some of the more common trees and animals of the woodland. One side features the turkey, duck, deer and possum along with pine trees. The other side shows a raccoon, goose, squirrels and a bear with an oak tree. While your children are climbing and sliding on the playsystem they can be learning about nature.

Everyone likes to be in a scene. Kids love to have their pictures taken as they become the head of the deer or the bear.

The Kidstuff Woodland Trees and Animals themed playsystem will stretch your children's growing bodies and minds.

The Woodland Trees and Animals # 1007 playsystem will accommodate 15 children ages 2-5 and requires a use zone of 32' x 20'.

Custom design your own themed playsystem for preschoolers. Or choose one of our other designs: a castle, the Alamo, a Pueblo-style house, farm animals or animal habitats.

Plan Your Playground

Together we can plan your playground when we have the following information

1. The ages of the children who will use the playground

Toddlers, preschoolers, primary and intermediate aged children are all at different developmental levels and different play activities are appropriate for the different age groups. Your playground design has to be age-appropriate.

2. Space limitations

We can configure a playground to almost any shape. We also must take into account the ASTM F1487 standard and the U.S. Consumer Product Safety Commission (CPSC) guidelines for playground safety. Every elevated playsystem has a use zone that is 6' in all directions from the outermost element. Our designers will work with you to design a playground that complies.

3. Budget

We can work with almost any budget. We may recommend small stand-alone events if your budget precludes a playstructure. Please remember that your budget needs to include, in addition to the cost of the play equipment, installation, safety surfacing and freight. Kidstuff Playsystems will do the whole package for you or you can make your own arrangements for the installation and safety surfacing. We need to know your budget and which services you want us to provide in order to provide you the best possible service.

4. Your Preferences

We will customize your playground by adding to or taking away from our standard playsystems and substituting events that you prefer. Or you can pick events from our event pages and we will custom design a playsystem to include them. Your Kidstuff Playsystems sales consultant will work with you to develop a design that is just right for you and the children you serve.

5. Project Execution

Your Kidstuff Playsystems sales consultant will work with you every step of the way to get your dream playground ordered, delivered and properly installed with an appropriate safety surface. This will insure that your children will experience years of safe fun and challenge on their playground.

Both models # 7374 and # 6865ss available with either 3.5" OD or 5" OD steel posts and either plastic or steel decks. Ask your sales consultant for details.

Playsystem # 6865ss

Playsystem # 6865ss

Children enjoy fun in the shade as the large 18' x 18' sun shelter protects them from harmful rays of the sun. This preschool playground is packed with climbing and sliding opportunities and includes 3 different slides and a variety of play panels. Playsystem # 6865ss contains 8 elevated play events, 4 ground level play events, and an ADA compliant transfer module and a built-in 18' x 18' fabric sun shelter.

Playsystem # 6865ss accommodates about 30 children ages 2 to 5 and requires a use zone of 35' x 28'.

Playsystem # 7374

This is a terrific starter set for your preschoolers. With 2 great slides and 2 fun climbers, it offers a lot of activity in a compact area. It includes 5 play events (4 elevated and 1 ground level) plus a shade roof and ADA transfer module.

Playsystem # 7374 accommodates 16 children ages 2-12 and requires an area of 27' x 27'.

Playsystem # 7294

Playsystem # 7294

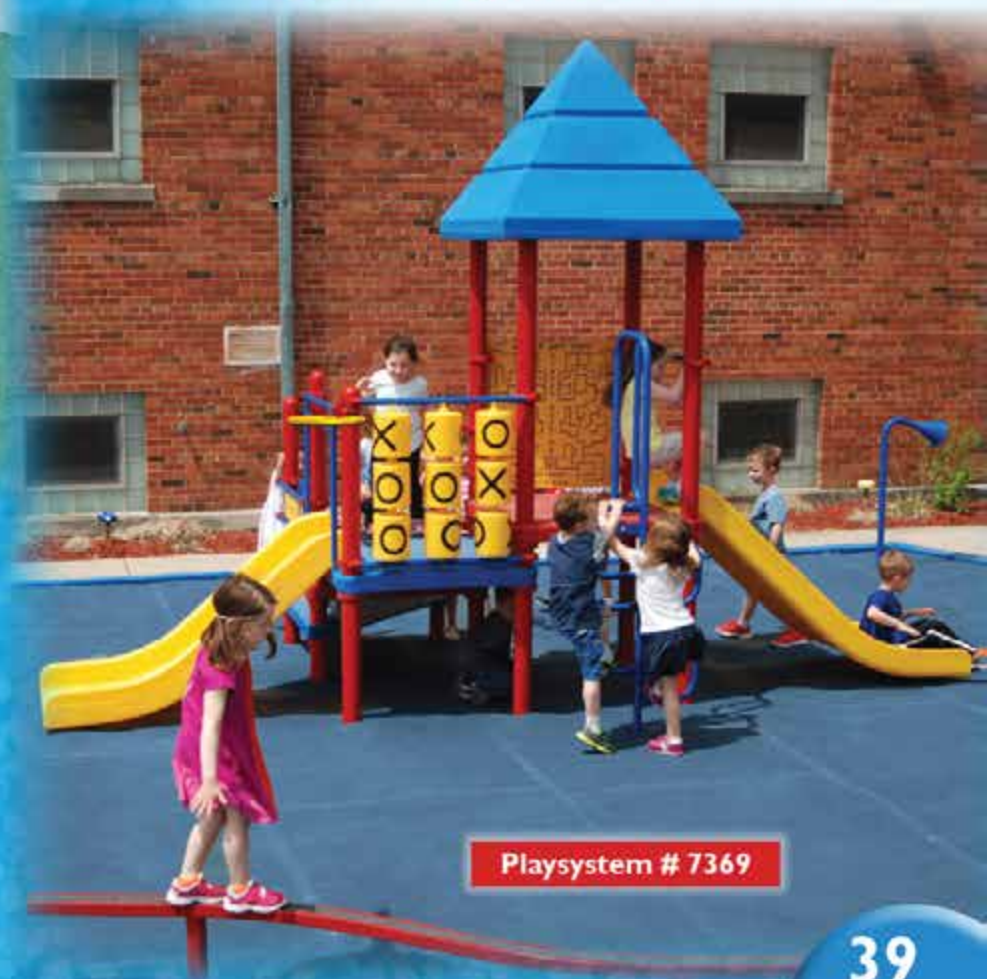

This playsystem offers climbing, crawling and sliding as well as a variety of interactive activities including conga drums, bongo drums, a storefront panel, and 5 different play panels.

Playsystem # 7294 accommodates 25 children ages 2-5 and requires an area of 30' x 26'.

Playsystem # 7369

This is our most popular small playsystem for early learning programs with 2 slides and an age appropriate climber. Playsystem # 7369 includes 6 elevated and 2 ground level play events, ADA transfer point and a roof. Pictured balance beam and fun phones are optional additions.

Playsystem # 7369 accommodates 15 children ages 2-5 and requires a use zone of 29' x 20'.

Playsystem # 7369

Both models 6600 and 6600ss are available with either 3 1/2" OD or 5" OD steel posts and either plastic or steel decks. Ask your sales consultant for details.

Playsystem # 6600ss

Playsystem # 6600ss

Same as Model # 6600 except an 18' x 18' built-in sun shelter replaces the pyramid roof.

Sun Shade

Sun shade protects children from harmful UV radiation, lowers the temperature under it and is rated for winds in excess of 120 mph. Fabric is high-density polyethylene with ultraviolet inhibitors. All connecting points are triple reinforced. Fabric is warranted for 10 years.

Playsystem # 6600 and # 6600ss accommodate about 15 children ages 2-5 and require a use zone of 29' x 28'.

Playsystem # 6600

A terrific small playsystem for your preschoolers. It has 2 slides and a popular climber. Playsystem # 6600 contains 6 elevated play events, 1 ground level play event, a roof and an ADA transfer point.

Playsystem # 6600

Independent Play Features Preschool Ages 2-5

Sandbox # 63388

Sandbox # 63388

Children love to play in the sand. Our 8' x 8' sandbox is built from red, blue, green and yellow molded plastic timbers. A plastic seat is attached in each corner. Includes steel stakes to attach timbers to the ground.

Sandbox cover # 63400

Sandbox cover material is reinforced 18 gauge vinyl and includes a sewn-in elastic shock cord to fit neatly around the top of the sandbox. Sand box cover comes with a reinforced center hole for drainage.

Sandbox cover # 63400

Sun shelter # 72020

Recycled plastic cottage climber, shown with a 20' x 20' sun shelter

Cottage Climber # 2746

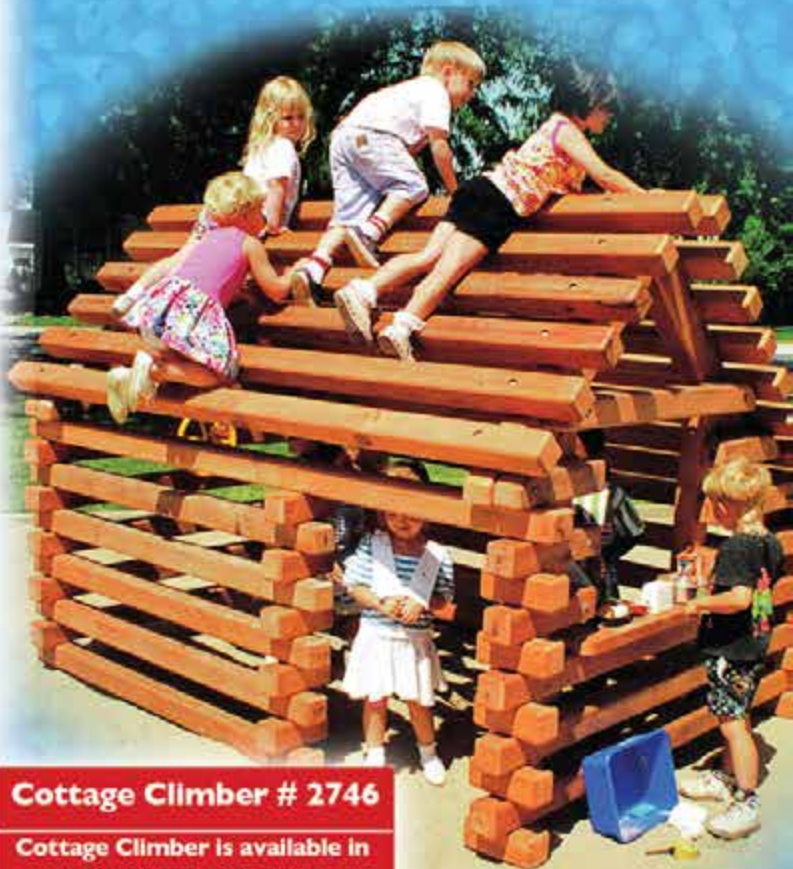

Our multi-purpose cabin is great fun for your kids. They will love to climb all over the roof or just hang out inside. Children use the play counter in a variety of games. The cottage climber accommodates about 16 children ages 4 and up and requires a use zone of 20' x 18'.

Model # 2747 is the Cottage Climber with a non-climbable roof.

Sun shelter # 72020

(20' x 20' shown on left)

Our sun shelters are fabricated of the best quality materials: high density polyethylene fabric with UV protection additives; double lock stitched seams, stainless steel fasteners and galv. steel posts. Built to withstand 150 mph winds, fabric is guaranteed for 10 years. Powder-coated posts and a variety of sizes are available. Ask for a quote.

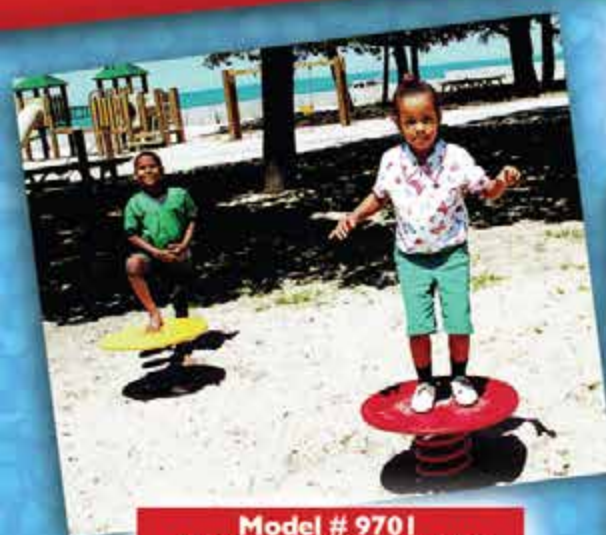

Cottage Climber # 2746

Cottage Climber is available in both treated pine and recycled plastic.

All Kidstuff Spring Riders are fabricated from high-density polyethylene (HDPE) $\frac{1}{2}$ " thick. Spring is specially designed for spring toys from $\frac{1}{2}$ " steel rod, powder-coated the color of your choice. Spring riders require safety surfacing 6' in all directions; however, use zones may overlap as long as there is 6' between all of the spring riders.

IPEMA Certified

To verify product certification
visit www.ipema.org

Overhead Events

Overhead events can connect 2 platforms, connect to a platform at one end and be freestanding at the other end, or be completely freestanding.

As dictated by the ASTM standard F1487, the heights of the platforms cannot exceed 36" for ages 5-12 and 18" for ages 2-5. The maximum height of the overhead is also dictated by ASTM F1487. Generally speaking the height of the handhold cannot exceed 84" for ages 5-12 and 60" for ages 2-5.

Arch Bridge 8' long with barrier rails

Guardrails and barrier rails serve to protect the children from falling off bridges. Guardrails prevent accidental falls off the bridge while barrier rails prevent a child from crawling or climbing off the side of the bridge. For ages 2-5, bridges must be protected with barrier rails when the bridge is over 30" high. For ages 5-12, a bridge over 48" requires barrier rails. Guardrails are acceptable under those heights.

Playground Safety Surfacing

All are ADA Compliant

Poured in place rubber surfacing (PIP)

- + mixed on-site and installed by professionals
- + smooth and seamless installation
- + attractive designs available
- + low maintenance
- expensive to repair
- requires a hard sub-base (compacted aggregate, asphalt or concrete) and excavation-- \$7 - \$9 per sq. ft.
- expensive-- \$11 - \$17 per sq. ft. depending on required fall height plus cost of preparing the base
- costs even more in quantities under 1,500 sq. ft.
- + available as a "bonded rubber" option, cutting cost by about 10%

Playsystem # 5885 Ages 2-5 years

In addition to KidSoft on the previous page, Kidstuff Playsystems offers several safety surfacing options to meet your safety surfacing needs. Here are some of the pros (+) and cons (-) of each.

Engineered Wood Fiber

- + specially shredded wood chips for playgrounds
- + wheelchair-accessible (regular wood chips are not)
- + good cushioning at 9-10" compacted depth
- + does not require a hard base
- requires border or sunken pit for containment
- deteriorates and requires topping off every couple of years; eventually turns to soil and needs to be dug out and replaced.
- + \$4 - \$6 per sq. ft. including borders and installation, plus freight.

Playsystem # 5285 Ages 5-12 years

Rubber Tiles or Mats

- + low maintenance
- + more durable than poured in place
- seams fill with dirt
- requires hard sub-base (see PIP above)
- + pricing is more practical than PIP for smaller areas
- expensive--\$14 - \$20 per sq. ft., depending on size and location, plus cost of sub-base and freight

Playsystem # 5721A Ages 2-5 years

Playsystem # 6067 Ages 2-5 years

Loose Rubber

- + Made from recycled tires, does not deteriorate
- + No splinters or splinters
- + Great cushioning at 6" depth
- + Loose fill does not require a hard sub-base.
- Requires border or sunken pit for containment
- Can be kicked and carried out by children
- Quite expensive- \$8 - \$10 per sq. ft. including installation & borders, plus freight.

Playsystem # 6670 Ages 5-12 years

Synthetic Turf

- + looks like grass, comes with or without "infill" (tiny rubber balls)
- + low maintenance
- + 10-15 year life span (comparable to PIP and tiles)
- Expensive--\$19 - \$24 per sq. ft. plus cost of sub-base plus freight.
- Requires a hard sub-base.

Safety surfacing sold by Kidstuff Playsystems carries the warranty of the manufacturer, which in some cases is not Kidstuff Playsystems. Ask your sales rep for the applicable warranty.

ADA Playground Regulations

Americans with Disabilities Act

In October, 2000 the Access Board issued a final rule on accessibility guidelines for play areas. These guidelines form the basis for standards under the Americans with Disabilities Act. Some of the more important provisions relating to playgrounds follow:

- * Play structures with 1-19 elevated play components shall have at least 50% of these components on an accessible route. In this case an accessible route consists of a transfer point 11-18" above ground where a child can transfer from a wheelchair onto the structure and then decks or steps at intervals of 8" or less up to higher decks where slides, panels and climbers are used.
- * Play structures with 20 or more play components shall have 25% accessible by a ramp designated for wheelchairs and an additional 25% reached by transfer steps and stepped decks where the rise of the steps does not exceed 8".
- * Each playground shall have ground level play components of different types. These events are entered and exited at ground level. Different types could include the experiences of rocking, swinging, climbing, spinning and sliding. The number of these play components required depends on the number of elevated play components in the play structure. You can add ground level events to comply with the requirements.

Note that certain church facilities are exempt from ADA. Contact the Access Board at outdoor@access-board.com to see if you qualify.

Kidstuff Playsystems Warranty

“You will not find a playground that is better, safer, or tougher than a Kidstuff Playsystem”

- * We design it to the latest standards.
- * We build it in the U.S.A.
- * We offer the options of installation and installation supervision.
- * We offer KidSoft Safety Surfacing, the best safety surface available.
- * If you need help designing a playground, call our CEO Richard (Dick) Hagelberg or President George McGuan at 800-255-0153.
- * We maintain a dealer network throughout the U.S. One of our sales consultants is ready to visit your site and to work with you to design your dream playground.
- * All of our playsystems meet or exceed government regulations, ADA requirements and industry standards. Come play with us!

IPEMA Certification Seal
To verify product certification
visit www.ipema.org

In the interest of playground safety, IPEMA (International Play Equipment Manufacturer's Association) provides a third party certification service where a designated independent laboratory validates a participant's certification of conformance to ASTM F 1487, "Standard Consumer Safety Performance Specification for Playground Equipment for Public Use," except sections 10 and 12.6.1. The use of the corresponding logo in Kidstuff Playsystems' catalog signifies that Kidstuff Playsystems has received written validation from the independent laboratory that the products associated with the use of the logo conform with the requirements of the F 1487 standard. Check the IPEMA website: www.ipema.org for a list of Kidstuff Playsystems' IPEMA-certified products.

Kidstuff Lease-Purchase Option

If you don't have all the cash you need to purchase your playground, our lease purchase option allows you to purchase the equipment, installation and safety surfacing out of your cash flow. We put you in touch with reputable finance companies to make it happen for you. A bit of advice: try your bank first. Their rates are likely to be better.

Our Warranty

All playground equipment requires regular care and maintenance. Kidstuff Playsystems provides you, the purchaser, with a maintenance system to keep your equipment in top condition for many years. All warranty claims must be accompanied by copies of your maintenance records.

Kidstuff Playsystems warrants all its products against defects in materials or workmanship for twenty-one years as follows (vandalism and abuse are excluded):

Year 1: Free repair or replacement--any defective element of a Kidstuff playsystem will be shipped and installed at our cost. Swing parts (chain, "S"-hooks, hangers, or seats) will be shipped free, but installation is excluded.

Year 2: 100% free replacement of defective parts, excluding shipping and installation.

Years 3-21: Kidstuff warrants the components of your system on a prorated basis; starting at 95% in year three. For example, if a part of your playsystem falls in year seven, you will receive a 75% credit (calculated from the part price at time of purchase) toward a new replacement part for your unit. Shipping and installation are owner's expenses during this portion of the warranty period. If Kidstuff elects to repair your part rather than replace it during any phase of this warranty, shipping back to Gary, Indiana, will be at our expense. If we elect to repair a part, the owner agrees to package/pallet and load the item.

Please be aware that Kidstuff Playsystems sells some products which are manufactured by others. Such items are excluded from this warranty and covered by that of the actual manufacturer.

We at Kidstuff Playsystems take pride in our products and believe that if you follow the maintenance system that is provided to you, your Kidstuff playsystem will be exercising the minds and bodies of children for years to come and you will be telling your friends and associates that you can't buy a better, safer or tougher playsystem than a Kidstuff Playsystem.
